FIREBOX

Creating your own insert bioethanol fireplace is easy with the Beauty Fires® Slimline firebox and Signature firebox collection.

These fireboxes offer you the ability to convert your existing fireplace or to create a new modern fireplace.

The Slimline firebox collection incorporates three sizes and the Signature firebox collection two sizes to give you the flexibility you need.

The fireboxes are available in black only with three fascia colour options. White, black and brushed stainless steel. They don't require chimneys and don't produce any smoke. This feature gives you the flexibility to install the fireplace in areas previously not possible.

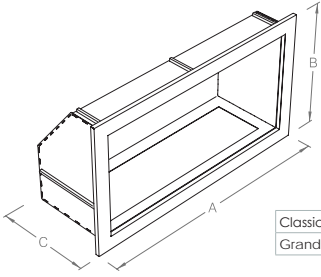

The slimmer depth design of the Slimline firebox collection makes it easy to install the fireplace without having to dedicate a large amount of floor space in your room.

The Signature firebox collection is bigger and bolder with more heat output.

AVAILABLE IN:

SIGNATURE RANGE
